

# DOTR-800

**DOT**  
THE MOBILE COMPUTERS

## DOTR-800 , UHF Reader

### Host environment

- Android
- Windows Mobile / CE
- iOS

Bluetooth connection

## DOTR-800 Key Features

### Cost Saving "2 Runner RFID Reader":

Easy toggle between RFID and barcode. Simply scan RFID and barcode with a push of either button, maximizing ease of use and productivity.

### Magconn™:

Easy connection using to transfer data or charge the device.

### Connectivity options:

Real-time wireless connection to mobile or backend systems with Bluetooth. Or just simply connect using Micro-USB

### Stand-alone Batch Mode:

If connection is not available, batch mode enables the collection of up to 1000 RFID/barcode tags of 60 bytes.

Search up to 50 different tags selectively.

Upload data to host device any time when connection is available.

### FastID™ and TagFocus™:

Maximum read speeds required to maximize workforce efficiency.

### Self Jammer Cancellation Technology:

Suppress noise signals for best possible reception of RF

### Instantly capture any printed or electronic 1D/2D barcode:

Imager offers advanced optics for lightning-fast capture of 1D and 2D barcodes – even if they are dirty, damaged, or printed poorly.

**IP68 Water/Dust Resistant**
